

Long Distance Glider

With this paper rocket you can send all your messages even when sitting in a hall or in the cinema pretty near the back.

Giant Wing

An unbelievable sailplane! It is amazingly robust and can even do aerobatics. But it best suited to gliding.

Cone Head Rocket

This paper arrow can be thrown with big swing. We launched it from the roof of a hotel. It stayed in the air a long time and covered a considerable distance.

Super Dart

The super dart can fly giant loops with a radius of 4 or 5 metres and cover very long

distances. Its heavy cone point is slightly bowed upwards to get the lift required for loops.

German Bi-Plane

Brand-new and ready for take-off. If you have lessons in the history of aviation you can show your interest by letting it land on your teacher's desk.
